

ENGI 1331 Workshop Exam 1 Discussion
MW 5:30 PM
Week 7 - Class 13 - 10/03/22

General Discussion:

1. As of Thursday (09/29), scores have either been posted or will be posted soon.
2. Look over the included Excel rubric and check for any issues. While issues are rare, they do occur. The deadline to dispute grading is soon, so message your professor ASAP if there are any issues.

Score Discussion:

1. The median exam score, at least for Dr. Burleson's class, was a 62/80 (78%). There were many perfect scores!
2. Students scoring above 64/80 (80%) on the exam had an average score of 80% on the exam. Students scoring below 48/80 (60%) had an average score of 45%.
3. Doing well on the MA's has a clear connection with doing well on the exams!
4. Please reach out to me, Sofia, another UTA, or your professor (or any combination of those) if you scored lower than around a 48/80 (60%). There is still time to recover, but it will require a change in how you prepare for future exams.
